Istanbul

Istanbul... A huge metropolis connecting continents, different cultures and religions; being home to eleven million people and one of the greatest business and cultural center of the region... Istanbul is both the nearest European city to Asia and the nearest Asian city to Europe. It has been a merciful shelter to people since 3000 B.C. and the great capital of Byzantium and Ottoman Empires. An irresistible beauty with its precious Bosphorus, unique historical inheritances adorning its silhouette, and of course with its hospitable people...

“Let’s meet where the continents meet”
