Dear Colleagues,

It is my great pleasure and honour to invite you to Turkey for the **International Basic Neurosurgery Course, Term I, Course III, "Spine and Peripheral Nerve"** which will be held in Antalya between March 14-18, 2014.

As I pointed out in my opening remarks at IBNC 2013, one of the most important aim of this course is to connect east and west, north and south to share science, peace, and friendship and moreover, to act as a bridge across civilizations on a scientific platform. It gives me a great honor to announce that Turkish Neurosurgical Society awarded total 185 scholarships to neurosurgery residents for IBNC 2012 and IBNC 2013. These Courses were a resounding success, attracting well over 120 attendees from 30 countries and 230 attendees from 65 countries, respectively.

Turkish Neurosurgical Society offers up to 2 scholarships to neurosurgery residents from each developing country. Again Prof. Gazi Yaşargil gave 5 scholarships for IBNC 2014. Also, the Middle East Spine Society offered 5 scholarships for residents from Middle East Countries.

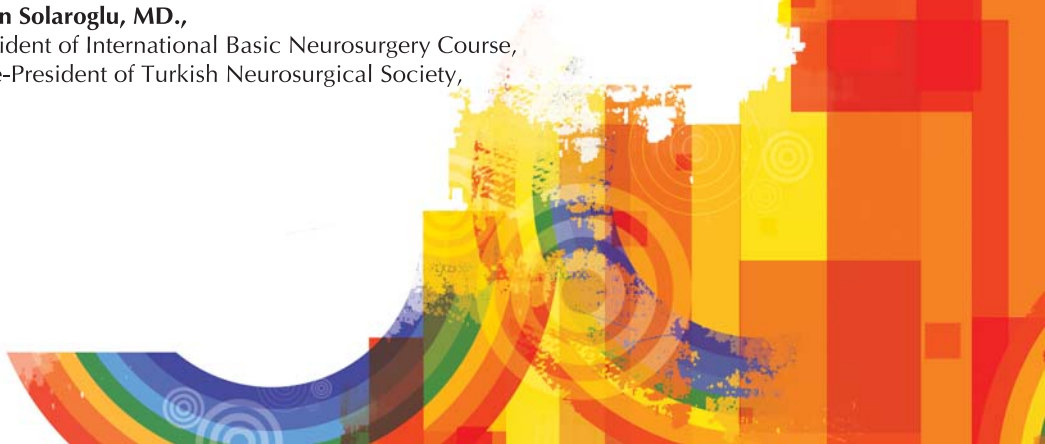

The **AANS/CNS Joint Section on Disorders of the Spine and Peripheral, Middle East Spine Society, and Turkish Neurosurgical Society Spine and Peripheral Nerve Surgery Education and Training Group** are also support IBNC 2014 by giving volunteer lecturers. TNS Spine Section will also give a kind gift to all attendees "**Principles of Spine Surgery**" book.

I warmly invite you to be part of the most exciting and innovative event in basic neurosurgical education.

All the best,

**Ihsan Solaroglu, MD.,**  
President of International Basic Neurosurgery Course,  
Vice-President of Turkish Neurosurgical Society,

Dear Colleagues,

On behalf of TNS Spine and Peripheral Nerve Education and Training Group, I am pleased to invite you to Turkey in 2014 for the International Basic Neurosurgery Course, Term I, Course III, "Spine and Peripheral Nerve" in Antalya.

TNS has been organizing training courses for neurosurgery residents and novice neurosurgery specialists since 2000 under the name Basic Neurosurgery Courses to standardize the basic knowledge of neurosurgery training and education. By the initiative of Dr. İhsan Solaroğlu and Dr. Feridun Acar, it was decided to organize basic neurosurgery courses in English with international participation. Since 2012, more than 300 young neurosurgeons from 68 countries have already attended the IBNC.

I believe the scientific program will be attractive for both young fellows and also for young spine specialists who wish to get precise scientific information and fruitful discussions.

I am sure that you will enjoy the science, the friendship and Antalya's warm atmosphere.

Regards,

**Ali Arslantaş, MD.**

President, TNS Spine Section
